I am currently a third-year student majoring in Information Systems at FPT University, Hanoi. During my years at school, I have acquired a lot of useful knowledge and skills, especially knowledge about corporate communications and skills in using SQL and MySQL software. In addition, I have learned about system-related knowledge, drawing diagrams such as swimlane, DFD level 0, ... I have also participated in a number of communication activities of the school as well as of the subjects. These are all useful experiences that help me learn the skills that a Tester Intern

WORK EXPERIENCE

05/2023 - 06/2023

DESIGN DATABASE FOR LIBRARY MANAGEMENT

Build a library management system to store, manage, and provide services for library materials and users. The project's goal is to create a complete and efficient system for document management, user management, and efficient provision of library services. Ensure that readers can access and use materials at their convenience, and that library staff have tools to manage and track materials and reader activity.

Survey libraries, identify entity, key attribute, relationships,....

10/2024 - 11/2024

PROJECT: SHOES WEB

A web app used to sell shoes online for customer

Connect to the database, create Login and Registration screenscreens
